CODE BREAKERS

In *League of Llamas Book 1: The Golden Llama*, Phillipe must enter a secret code to open General Bottomburp's office door so he can retrieve stolen files. It's an incredibly dangerous and delicate operation because Phillipe has to enter the code while dangling upside down from a manhole in the ceiling! And because Phillipe is upside down, the numbers he enters read as words.

Have you ever used a calculator to create numbers that spell out words when they're turned upside down? It's a super simple, super fun way to create your own code. Here's how to decipher the numbers.

2 = Z
3 = E
4 = H (h)
5 = S
6 = G
7 = L
8 = B
9 = G

These are the numbers that Phillipe encounters in *The Golden Llama*. Can you work out what words these numbers spell upside down?
